Current position: Lecturer in Security and Crime Science, University College London

Qualifications

PhD Social Psychology, Université Libre de Bruxelles (Belgium) Supervisors: Prof. Olivier Klein and Prof. Karen Douglas (University of Kent, UK)	2010-2014
Erasmus Exchange Student, Rijksuniversiteit Leiden (The Netherlands)	2005-2006
Diplom Psychology (MSc equivalent), Minor: Intercultural Communication Friedrich-Schiller-Universität Jena (Germany)	2003-2009

Research

Lecturer from 2020
University College London, Department of Security and Crime Science (UK)

Current research

Active and Passive Internet Use and Attack Planning: Assessing risk assessment files of individuals who had been convicted on terrorism-related charges in England and Wales in the last ten years, I examine whether the active promotion of terrorism online is associated with a lower likelihood of attack planning/execution (with Dr Jonathan Kenyon, HMPPS).

The Impact of Terrorist Attacks on Political Attitudes and Behaviour: I conduct a p-curve analysis of the current literature to identify its evidential value.

Completed projects

Exposure to Radicalising Information: Relying on data from a representative survey, I assessed patterns of active selection of and incidental exposure to radicalising information as indicators for support for violent extremism.

Documenting the Importance of Assessing Measurement Invariance: With Dr Michael Wolfowicz (Hebrew University, Israel), I tested measurement invariance of the morally debatable behaviour scale as implemented in wave 7 of the World Values Survey.

Perceptions of Online and Offline Hate Speech: In an experimental study, I investigated whether bystanders view online incidents of racial hate speech differently than offline offences.

Public Support for Terrorism: Working with data from the Pew Global Attitudes Survey and the Global Terrorism Database, I examined the extent to which terrorist attacks against ingroup and outgroup members predict support for terrorism in Jordan.

Registered Replication: I completed a direct replication study to test the relationship between cognitive flexibility and support for violent extremism.

Dr Sandy Schumann

Evaluation of the Tony Blair Institute of Global Change Generation Global Digital Dialogue Program: I developed measurement tools, liaised regularly with the project lead to advise on how measures should be implemented, and designed a comprehensive data analysis plan

Social media use and populist attitudes: PI, with Dr Franziska Ehrke (University Koblenz-Landau, Germany): I lead a longitudinal online survey study to investigate the reinforcing spiral of selective information exposure and extreme political attitudes

Hate crime victimisation during the COVID-19 outbreak: I analysed police crime data and conducted a victimisation survey to examine whether ethnic hate crime victimisation increased following the COVID-19 outbreak

Post-doctoral Research Assistant

2017-2020

University College London, Department of Security and Crime Science (UK)

Long-term evaluation of the Soliya virtual exchange programs: I designed and analysed data of two three-wave longitudinal studies to assess whether online intergroup contact programs run by Soliya are associated with changes in prejudice, confidence, and supportive outgroup behaviour

GRIEVANCE (PI: Prof Paul Gill): With Dr Kurt Braddock (American University, USA), I analysed if factors of the dark tetrad enhance the persuasiveness of terrorist narratives

Minerva (PI: Dr Noémie Bouhana): I coordinated a project funded by the US Department of Defence; I designed, conducted, and analysed a postal community survey, administered in 30 000 households in London, to assess the social-ecology of homegrown radicalisation; I compiled an open source data set of more than 1000 homegrown terrorists to identify hotspots of radicalisation in the UK, the Republic of Ireland, and the USA

Ethnic hate crime intervention: PI, with Dr Tristan Caulfield (UCL), Prof Matteo Gagliolo (Université Libre de Bruxelles), and Mrs Julia Eberlen (Université Libre de Bruxelles), I assessed in experimental studies situational factors that determine bystander intervention in ethnic hate crime

Post-doctoral Research Associate

2014-2017

University of Oxford, Centre for the Study of Intergroup Conflict (UK)

The effect of computer-mediated intergroup contact on prejudice: I conducted experimental studies to assess whether computer-mediated intergroup contact reduces prejudice and increases support for democracy, I developed a computer-based intervention for two schools in the Greater Manchester area to promote contact between ethnic groups and enhance endorsement of 'British values'

Digital Influence Study: With Prof. James Liu (Massey University, New Zealand), as part of a larger cross-cultural project, I analysed a longitudinal survey study in Germany to examine the effect of social media use on support for populist radical right parties

Research Assistant

2009-2010

Friedrich-Schiller-Universität Jena, Unit of Intercultural Communication (Germany)

Intra-organisation collaboration during mass casualties: I explored archival data and organisational documents to map inter- and intra-organisational communication patterns of

Dr Sandy Schumann

police and fire departments, I undertook expert interviews and A/B tests in order to compare attitudes towards software solutions that might improve inter-organisational collaboration in mass casualties.
